Intensive Seminar *Managing Landscape processes*

Prof. C. Cassatella (DIST, Politecnico di Torino)

3rd-11th March 2016

Landscape is a process. As a consequence, management is the most appropriate approach for defining landscape policies: a concept still vague where planning activities, governance systems, economic factors and social attitudes may play a significant role.

The Seminar will deal with landscape management, analyzing case studies in Italy and Japan. Two countries geographically far apart, but with similar problems: decreasing and ageing population, valuable traditional rural landscapes, urban sprawl, concern for conservation policies.

The “Green Crown” of Turin’s metropolitan area, a regional program on interventions carried out since fifteen years now on, is the first case study, which will be explored through field trips and meetings with stakeholders and “landscape managers”.

The sustainability of preserving traditional landscapes in Japan, facing the cost of labour and the societal changes, is the aim of a research activity carried on by the Nagoya University, School of Environmental Studies. Prof. Hiroyuki Shimizu will illustrate his own approach to the evaluation of landscape “labor forces”, as a basis for setting sustainable management perspectives.

3/03/16 h. 14-18, aula 4UP Introduction to the Green Crown of Turin (Italian language)
h. 14-16 C. Cassatella, *La Corona Verde di Torino, Pianificazione strategica e governance*
h. 16-18 A. Longhi, *L’analisi storico-critica del territorio per il progetto Corona Verde*

07/03/16 h. 9-17 Guided tour to the interventions in Corona Verde East: Villa della Regina, Superga Panoramic Route, Parco Meisino, Cascina Bordina. Meetings with local authorities, and landscape managers

10/03/16 h. 9-17 Guided tour to the interventions in Corona Verde West: Stupinigi, La Mandria Park, Venaria. Meetings with local authorities, and landscape managers
*Guided tours by bus, free of charge, reservation needed (claudia.cassatella@polito.it). Free time for lunch (not provided).

11/03/16 h. 9-13 Seminar *Landscape management*
Introduction by C. Cassatella

h. 9-11 Lecture: Sustainable landscape management. Proposal of landscape management labor accounts
Hiroyuki Shimizu (Nagoya University, Graduate School of Environmental Studies)

h. 11-13 Speeches
Mauro Volpiano, *Historic character of landscape. Studies for the management plan of Unesco WHS Royal Residences of Savoy*
Bianca Maria Seardo, *Terraced landscapes. from acknowledgment to planning and management*
Enrico Gottero, *Landscape indicators for rural policies*
Marta Bottero, *Landscape economic evaluation*
Marco Devecchi, *Participation: experiences of landscape democracy*
Marco Santangelo, *Urban/Rural: definitions*
Giancarlo Cotella, *Governance issues in urban-rural interface*

h. 17 Exhibition Opening:
Landscape and regional Planning Studio
Sala delle Colonne, Castello del Valentino
